Cool.

Gentoo Linux users may be interested in testing the \*unofficial\* ebuilds I just made for dev-ada/gps-bin and dev-ada/gtkada (since GPS requires GtkAda 2.4.0).

Find the ebuilds and updated manifests as attachments to the "bug" reports announcing them:

<[http://bugs.gentoo.org/show\\_bug.cgi?id=75630](http://bugs.gentoo.org/show_bug.cgi?id=75630)> (for GtkAda)

<[http://bugs.gentoo.org/show\\_bug.cgi?id=75631](http://bugs.gentoo.org/show_bug.cgi?id=75631)> (for GPS)

Use with caution, and please report any bugs in the ebuilds to those same URLs.

Merry Christmas!
