Hey My Name Is Paul I Was Born In 1993  
And Know C/C++ Python And Some Other Things  
I Dont Need To Disscuss. I Need Help Making An Os  
I Made A Kernel In ASM And C But I Dont Get It All  
100% I Understand What It Dose And Such But I Cant  
Code ASM. And Even With My Knollage In Hardware,  
Binary, Programming, Linux I Still Need Some Actull Person To  
Walk Me Through It. Most People Dont Help Me Because Of My  
Age. So I Came Here. I Have Been One Of The FIRST GMail Members  
I Was Here With Google From Age 8 And Said Why Not :)  
Anyone Wont To Help ???

No. I'm working on my own... But, there are a bunch of people on various newsgroups who are interested and knowledgeable about various issues. But, you need to know what your problem areas are first. I'd start with advanced Google and Yahoo searches for webpages & forums on what you want. For example, you could search for specifications, programming guides, documentation. You can also search newsgroups with Google and find good information. This is good for finding obscure things like programming a specific port or will lead you back to the documentation you need.

Some links which may be useful:

Alexei Frounze's OS pages  
<http://alexfru.chat.ru/eindex.html>

Chris Giese's OS pages  
<http://my.execpc.com/~geezer/>

Groovy Web "how to write your own OS"  
[http://www.groovyweb.uklinux.net/index.php?page\\_name=how%20to%20write%20your%20own%20os](http://www.groovyweb.uklinux.net/index.php?page_name=how%20to%20write%20your%20own%20os)

## Re: Hey Need Help Making An OS

Also, other newsgroups may be helpful.

You might look at a OS newsgroup:

alt.os.development  
alt.os.free-dos

You might look for a newsgroup for the C compiler you're using:

comp.compilers.lcc  
comp.os.msdos.djgpp  
openwatcom.users.c\_cpp

You might look at an assembly language newsgroup:

alt.lang.asm  
alt.os.assembly  
comp.lang.asm.x86
