C'mon, you Masm guys, give Gideon a hand with this!

What? Perhaps help like this, "MASM the hard way":

LNK563.EXE contains LINK.EXE and CVPACK.EXE for Visual C++ version 1.52.  
<http://download.microsoft.com/download/vc15/Update/1/WIN98/EN-US/Lnk563.exe>  
<ftp://ftp.microsoft.com/Softlib/MSLFILES/LNK563.EXE>

BINS\_DDK.EXE contains EXE2BIN.EXE as Bin\_win98\_exe2bin.exe (and possibly other stuff...)

[http://www-static.cc.gatech.edu/computing/classes/AY2002/cs4455\\_spring/Asst2Files/BINS\\_DDK.EXE](http://www-static.cc.gatech.edu/computing/classes/AY2002/cs4455_spring/Asst2Files/BINS_DDK.EXE)  
(Unfortunately, I couldn't find a valid MS site link for this... I did find another link to a site in the .ru domain, but the file appeared to be bad.)

ML611D.EXE contains ML.EXE v611\_D, final DOS version of ML.EXE  
<ftp://ftp.microsoft.com/Softlib/MSLFILES/ML611D.EXE>

ML612.EXE contains update from ML611D.EXE to Windows ML.EXE v6.12  
ML613.EXE contains update from ML611D.EXE to Windows ML.EXE v6.13  
ML614.EXE contains update from ML611D.EXE to Windows ML.EXE v6.14  
(<ftp://ftp.microsoft.com/Softlib/MSLFILES/>)  
(these aren't needed for a Windows version of ML.EXE since VCPP5.EXE has the newest Windows version)

ML614.EXE contains WIN.INC  
<ftp://ftp.microsoft.com/Softlib/MSLFILES/ML614.EXE>

VCPP5.EXE contains Windows ML.EXE v6.15, ML.ERR, H2INC.EXE, H2INC.ERR

<http://download.microsoft.com/download/vb60ent/Update/6/W9X2KXP/EN-US/vcpp5.exe>

Re: C# programmer wants to learn assembly?? plz help

NMAKE15.EXE contains NMAKE.EXE and NMAKE.ERR

<http://download.microsoft.com/download/vc15/patch/1.52/w95/en-us/nmake15.exe>

MASM 6.1 Programmer's Guide as complete PDF

<http://ece.uprm.edu/~mtoledo/4206/ProgrammerGuide.pdf>

MASM 6.1 Reference as complete PDF

<http://ece.uprm.edu/~mtoledo/4206/Reference.pdf>

There are a number of non-MS sources for these (you search):

DOSXNT.EXE

DOSXNT.386

I'm not sure if they can be found in one of the files in the mslfiles directory. The version of DOSXNT.EXE that I have doesn't match the ones on the net... ?!?! Okay, where did it come from?

(How hard is it for MS to just leave this stuff hanging around on an ftp server for decades?)

;)
