hello,

i have a program that reads a file of size 635
and loads it in to memeory for analysis.
i compiled the program with the command

```
"gcc myprog.c -lefence -g"
```

after that i used gdb to run my program..
the gdb output says the following

```
mmap() failed: Cannot allocate memory  
Program exited with code 0377.
```

i dont know how to overcome this problem...
please guide me out..
thanks..for all those who have helped me till now
and for those who are going to help me..
i dont want to flood everyones mailbox with
thanks...so i thank all of u now...
