Well, if you didn't take the time to read it, why are you posting angry messages into the Eternal Record of the Internet. It could make you look the fool.

> No, I won't thank you for playing. Your double dishonesty should not be

> thanked, nor should your idiocy.

I wrote all of the text in this message that is not prefaced with indentation characters. Does that make it clear to you? I wouldn't want another misunderstanding on your part to make me seem dishonest in your eyes. In fact, I would like to go on record as saying I have and will always preface quotations with some indentation characters. In the spirit of honesty and the fact that that's the way it works.

My idiocy is also on record, nor are you the first to notice. Nor are you the last.

And thanks for playing, again. Three times is, of course, the charm, as stated above, so I expect an even longer rant about some meaningless lesson on honesty and textual invention in the future. Please try to add a Haiku to Array your anger and indignity with more, oh let's say, Dynamics. Regards.
