```
hi,  
i tried with this simple code  
int array[],i;  
for(i=-1;i<=sizeof(array);i++)
```

but the condition is failing always even array size is greater than zero.

The code you have posted does not compile. You claim that "the condition is failing always", which suggests that you do have a program which will compile. I suggest you post that program, and ask for feedback on it. What you have posted here is so incorrect in so many ways that it is not clear exactly what you are asking.

can u help me.....

Whoever taught you English has misinformed you, and done you a disservice. The letter 'u' is not a substitute for "you". It is just a letter of the alphabet. Using it incorrectly in place of "you" makes your article less pleasant to read, and some people here who could help you may not bother to read your article if you are making it needlessly unpleasant to do that.
