Geneva print is made by the Geneva law in 1886. Geneva law intended to protect the real production of watches in Geneva, so as to avoid other inferior Fendi Watches Zipcode products marked with Geneva made being sold. So far, it has been revised several times to meet the

changes of the times. The watches which comply with the standards movement watches will be eligible for Geneva imprimatur, the print is carved Marker in Geneva emblem of the 'hawk' and 'key'. Geneva law requirement of each part of the movement should be to made in accordance with established rules and regulations exactly, although some parts may be purely decorative, but can fully reveal the watches totally dependent on artificial completed. Fendi Watches Zipcode For example, all acute angle must be cut into slope, further polishing; and Cyclovirobuxine gear is decorated artificially and polished with wood. The rule was made to remove all inferior products to ensure each one watches are completed in the best craftsmanship and materials. Today, this rule has become the guarantee of making watches in highest craftsmanship. Early watches manufacturers to prove the accuracy of its products usually have their Fendi Watches Zipcode and clocks be identified by the official observatory, then all Observatory in Europe, including London, Paris, Geneva watches manufacturing center had such service. Later watches manufactures slowly moved to Geneva, official Observatory in Geneva could not load all the works. In order to promote their products, Switzerland government set up a full-time official of the test center called Swiss Official Chronometer Testing Agency (COSC), by Swiss Calibration Service of the Swiss Federal Metrology Bureau (SCS) has proved its impartiality. Watches tested by the COSC called CHRONOMETER (The Table), Fendi Watches Zipcode every one of the movement have independent code and supporting documents, on behalf of certain of its accuracy. In watches making craftsmanship, Observatory watches can be said to be pursuing a not bad ever extreme realm. Error of Mechanical watch a day is 15 seconds, the Observatory watches particularly emphasize movement, material and craftsmanship, error a day at -4 to +6 seconds and the quartz watch is strictly controlled in the +/-0. within two seconds.
