hi all,

i have downloaded copy of clips tool but it was downloaded very long back.but the tool is executing very slow.i want my application to run within 20 ms and give the results to one more application after processing the data.

i did not find any newsgroup for clips...has it become obsolete?
can anyone please reply how to make this tool execute faster in order to use it in my real time application.

I couldn't find any 'NASA' lists, but I did find several 'sci.space' listings. You could even search through lists with just 'space' in

Re: clips NASA

their title. These lists would be much more appropriate than a list discussing how to write programs in a specific language.

Your question is off–topic for this group, unless you want to discuss any aspect of the source code for your copy of CLIPS and if that source code happens to be 100% ISO C.

You will have to consult in a group or forum where usage of CLIPS is topical. Maybe these links might help.

<<http://en.wikipedia.org/wiki/CLIPS>>

<<http://clipsrules.sourceforge.net/index.html>>

<<http://clipsrules.sourceforge.net/OtherWeb.html>>

<<http://groups.google.com/group/CLIPSESG/>>

<http://sourceforge.net/forum/?group_id=215471>

<<http://www.siliconvalleyone.com/clips.htm>>

<<http://www.cs.cmu.edu/afs/cs/project/ai-repository/ai/areas/expert/systems/clips/0.html>>

PS. Also try not to top–post on Usenet.
