Howdy

i am newb somewhat to programing and i was just for fun trying to compile a program that asks the user for an odd int less than 22 and then returns this

```
*****
```

```
***** *****
```

```
***** *****
```

```
***** *****
```

etc. the first line reps. the number entered by user

but i am having trouble i can get the first line but am having trouble making the white space in the middle i am using a nested loop. Should i use arrays? Any help would help thanks

Josh
