Get books. Really. The vast majority of the 'information' you'll find online is simply incorrect. Get books. You'll be glad you did. I second the recommendation of Francis' "You Can Do It" book (it simply slipped my mind when I responded before). I'm not in its target audience, so I don't have a copy, but I did peruse one in a book store, and I feel it is of high quality. (And a 'bonus', Francis is a regular participant here.).
