:>138755482 ... is that correct?

A completely different story. You are now using an overlay and you aren't using COMP.

```
VAR9 = 013875548
VARLST = 2
```

Should you use the mailblocks package and expect a response from me, you should preauthorize the [dissensoftware.com](http://www.dissensoftware.com) domain.

I very rarely bother responding to challenge/response systems, especially those from irresponsible companies.
