Given that the stars consume hydrogen and produce helium and other elements. Would you mind explaining where and how uranium is produced and how long it takes to make that particular element.

I suppose God created it instantaneously, like the granite & polonium. Why would we assume otherwise?

I can see why you would believe as you do. However: no reference to Polonium spheres nor any indication as to why they are a problem for science. I see no reason why a god should create a naturally occurring chemical as a problem for science. In deed, your belief is that all evidence as to age was planted by a devious god to dissuade us from christianity so why should he plant evidence to prove science false?

Right. Right down through the 50 miles of rock. Everyone can observe meteorites. No doubt you've observed this migration through 50 miles of rock also, which is why you're so sure? Like I said: long and complex processes that are entirely theoretical and cannot be
