Hi,

>From the Project->Import Type Library->Microsoft ADO Ext. and rename TTable to TADOXTable, etc..

and use this code to create the databse:

```
procedure TForm1.CreateDatabase(dbname: string);
var
  db: variant;
begin
  dbname := 'c:\test.mdb';
  db := CreateOleObject('ADOX.Catalog');
  try
    db.Create('Provider=Microsoft.Jet.OLEDB.4.0;Data Source=' + dbname +
';Persist Security Info=False');
  finally
    db.Free;
  end;
end;
```
