Hi,

I think we can check the status of the ADODataset when close form. May be like this

```
FormCloseQuery(...)  
begin  
if ADODataset.State in [dsEdit,dsInsert] then  
if MessageDlg('Save change?',mtConfirmation,[mbYes,mbNo],0) = mrYes  
then  
ADODataset.Post  
else  
ADODataset.Cancel;  
end;
```

Thang
