Stephan, thx!

Hmmm...Sounds good...I'll try!

For Stefan to Stephan...My name is Adam Stefan(!!!) Costa :D

It's a good sign!

"Stephan Haidinger" <noxspamhaidinger@xxxxxx> wrote in message news:455b2fef@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx

don't know if it's the same
but I had to set param.size := 1 for empty string param values (default was zero)
maybe you can try this

"AdamStefanCosta" <adam9000@xxxxxxxxxxxxxxxx> wrote in message news:4554e77d@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx

I found in Tamaracka anyone that get the same error...in the same circumstances:

Subject:

"ADO Changing varchar to text when NULL supplied"

Is posted in 05/24/2002, with no resolutions :S

Article number: 3555500

"Kevin Frevert" <kevin@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx> wrote in message [news:4554d221\\$1@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx](mailto:news:4554d221$1@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx)

Adam,

I don't know exactly where it is (an issue with ADO?)

Re: The data types varchar and text are incompatible in the equal to operator

Re: The data types varchar and text are incompatible in the equal to operator

Midas?), but a
workaround is to use the keyword LIKE instead (tested using
D6/MSSQL
2005/ADO 2.8).

Ex. (CommandText property of a TADODataset at design
time)

```
Select Something  
From SomeTable  
Where SomeValue LIKE :SomeValue
```

In Delphi (opening the clientdataset)

```
Param[0].Value := SomeStringValue;
```

Good luck,
krf

Hi Community

In a MIDAS application, TClientDatasets
with String params set equal to
blank (...param[0].value=") generates the
follow error when I convert
my ApplicationServer to ADO:

"The data types varchar and text are
incompatible in the equal to
operator"

In BDE this error do not exists...

Are there some parameter in ADO
Connection String to supress this
error? Are ansi null related problem???

SQLServer2k5 | ADO Broker (D7) | ISAPI
InternetExpress (D5)

Thx in Advance...
