Hi Adem

Known problem with the preliminary exe's.

It has been discussed in this NG and I am still trying to figure out a solution.

I can only figure out one way to solve the problem and this is by disabling the test for being the first unit, but this involves making changes to the FastMM4 and NexusMM sources and this is not something I want. I hope that Nexus and Pierre will help me out.

I can make some preliminary exes with the tests disabled. Will do this now.

Best regards
Dennis Kjaer Christensen
