Well I also tried to get the Bdp version working.

I copied some DLL's etc like

Borland.Data.Provider

Borland.Data.Common

etc

But then it says this: ??

?

Description: An unhandled exception occurred during the execution of the current web request. Please review the stack trace for more information about the error and where it originated in the code.

Exception Details: Borland.Data.Common.BdpException: ?

Source Error:

An unhandled exception was generated during the execution of the current web request. Information regarding the origin and location of the exception can be identified using the exception stack trace below.

Stack Trace:

[BdpException: ?]

```
Borland.Data.Provider.BdpDataAdapter.e() +652
Borland.Data.Provider.BdpDataAdapter.EndInit() +59
WebForm2.TWebForm2.InitializeComponent()
WebForm2.TWebForm2.OnInit(EventArgs e)
System.Web.UI.Control.InitRecursive(Control namingContainer) +241
System.Web.UI.Page.ProcessRequestMain() +174
```
