Perhaps, but that's "old tech". I'm spending the two weeks before BorCon recording a whole slew of camtasia's to render to flash and provide to my tutorial attendees. That way, they can replay the demos and even hear some of the original artists (the engineers) discussing the features they've done.

It's a bit of a risk because some might complain about some parts of my tutorials being "canned" but this is all new stuff that I'm putting together explicitly for my tutorials so that people can take it away with them.

... and to save my voice ;)

Maybe I can even take a quick bathroom break while playing one of the longer ones.

Not all of the demos will be pre-recorded because I think I simply won't have the time, but I'm going to generate as many as I can. Probably around 2 hours worth of material that I'll put up as BDNtv episodes when we launch.
