Microsoft, Intel and HP bring their Route64 Training Tour 2005 to North America and Europe.

Quote from <http://www.route64.net/>:

"The 64-bit age has arrived! New Windows and SQL 64-bit products from Microsoft will be launched in 2005. Microsoft, Intel and HP want to work with valued partners and customers to take advantage of this new platform."

"Windows 64-bit is ready, are you?"

"New Market Opportunities: Windows 64-bit is an ideal platform for technical computing, database, business intelligence, ERP, HPC and security."

>From the training overview at <http://www.route64.net/classinfo.aspx>:

Day1:

- 64-bit Roadmap (Microsoft, Intel & HP)
- Architecture & Tools Overview
- Migrating C/C++ Applications to Windows 64-bit (Part I/II)

Day2:

- Running 32-bit applications on Windows 64-bit
- Preserving 32-bit dependencies
- .NET managed Code in 64-bit
- COM Components in 64-bit

Day3:

- Migrating and Optimizing to SQL Server 2000 64-bit Edition
- Using Performance Analysis Tools
- Optimizations using Intel Compiler for 64-bit

borland.public.delphi.non-technical: [64-bit native compiler] new Route64 workshops

I wish representatives from Borland would participate on Day1 and would give us their share of their own 64-bit roadmap (Delphi 10 with a DCC64 preview, anyone?).

Danny, make some real use of your 3 AMD64-machines and give them some stuff to eat (native)!

I will try to attend the munich workshop. If other community members should attend there as well, then please let me know and we can arrange for a meeting (psleuth@nospam.gmail.com).

Best regards,

-Peter
