"Everyone" is quite a generalization and I suspect that those that you perceive to have a chip on their shoulder will not see themselves as having one. But without calling them out specifically, we won't know; I am not suggesting that you do that.

FMPOV, there are reasons for this; not the least of which is Delphi 2005, IMO. I wouldn't want to forget the milding "IMO"....

again!<g>

Borland can always shut down non-tech for couple of days...but I doubt that's going to happen.

So those that want to take a break, can do so for their own mental health, and those that perceive themselves as chip-free will continue on. I can tell you without a doubt that I have tried to take a step back in the past few weeks...I just wish the top 5 posters in this group would as well. :)
