I was trying to run 16-bit apps on Windows 2003 server x-64 and they wouldn't run. Runs fine on XP though.

Except having apps generated with D1 run in Vista. ;~)

Don't tell me they discontinued the 16-bit subsystem?! OMG! :)

Would you prefer I lie? ;~)

Win16 apps will not run on Vista. I tried installing an old D1 app of mine as a test just to make sure they hadn't had a change of heart at the last moment and sure enough it failed to install.

Okay, all right, what about D2?

Sorry but I'm all out of D2 apps. ;~)
