As I've now commented elsewhere, I am sure I specified an upload. I don't seem to be able to add it later, so I've uploaded to [www.matthew-jones.com/temp\\_xfer/icon-problem.zip](http://www.matthew-jones.com/temp_xfer/icon-problem.zip) (replace obvious part and all is as it should be).

Thanks for the attachment. I can reproduce the issue with your attachment.

I have added the sample project to the QC as well as a screenshot of how ALT+TAB appears.

In the screenshot you will see a version of the icon that is correct, this version was built with the RTM version of Delphi 2007. The executable with the bad icon in the ALT+TAB window was built in Vista using Delphi 2007 with Update 1 applied.

When running the executable built with Update 1 on Vista, it also shows the upscaled 16x16 icon in the Alt+TAB window.
