Idea of outsourcing is to other parts of the world is just another pyramid scheme on global level.

How do you manage to equate it to a pyramid scheme? There is no difference between trading with your next door neighbour or trading with someone on the other side of the world. As long as both parties are happy with the trade, it is not a fraud. A Ponzi (pyramid) scheme only works as long as there are ever more people coming into it to keep paying off people before them, and so runs out quickly. Trade, local or global, is just that – a legitimate trade.
