Re: ReportBuilder 9.03 is now available for Delphi 2005, Delphi 7, and Delphi 6!

Re: ReportBuilder 9.03 is now available for Delphi 2005, Delphi 7, and Delphi 6!

>> 1. Designer

>> – Added Undo support for drag and drop from data tree

>>

>> 2. Server

>> – Updated web browser detection to include FireFox

>>

>> 3. TeeChart

>> – Added support for TeeChart 7.05.

>>

>>

>>

>> Fixes for Version 9.03 – 10/11/2005

>> -----

>>

>> 1. Designer

>>

>> – When a docked tool window is hidden and re–shown, the width of the tool window was not restored.

>> – Setting Report.Language did not update the language for the popup menus.

>> – Added language support for the 'No DataPipeline assigned' caption displayed for a Report, Subreport, & Crosstab.

>> – Fix for RichText Editor in Delphi 2005, the FontComboBox was getting cleared.

>> – Fixed issue where DBMemo was not displaying the field alias in the designer as the caption when loading a saved template.

>>

>>

>> 2. PDFDevice

>>

>> – Fixed issue in which the bitmap object was being freed twice when exporting a non–bitmap scaled image to PDF. (Caused an AV).

>> – Fixed issue where the output stream was being accessed after it had already been freed when canceling PDF generation.

>> – The partially created PDF file will now be deleted from the hard drive when the report generation process is canceled.

>> – Enhanced font handling for TimesNewRoman and Arial fonts.

>>

>> 3. Engine

>>

>> – Modified OpenDataPipeline method to include the original exception message when re–raising an exception that occurs while opening a datapipeline.

>> – Canceling a report that is being exported to file did not free the output

>> stream. This resulted in an error if Report.Print was subsequently called.

>> – Fixed issue in which a variable does not correctly save its value to

>> cache if its compute is never called. For example, when a main report has

>> a

>> variable that is incremented in a subreport.

Re: ReportBuilder 9.03 is now available for Delphi 2005, Delphi 7, and Delphi 6!

>> – Fixed issue where page total was incorrect when a TppVariable was set  
>> to  
>> reset on page end.  
>> – Fixed issue in which spaces were not being striped off memo lines when  
>> full justified.  
>> – In some cases dataset bookmarks were not freed, causing a memory leak  
>> – Added code to handle case in which a title band prints over several  
>> pages  
>> before a static height detail band gets a chance to print. This prevent  
>> an  
>> exception from being raised by the report engine.  
>> – Fixed memory leak in the mail merge feature of the RichText component.  
>>  
>> 4. Printer  
>>  
>> – Fix for case in which the default printer is not installed on the  
>> machine.  
>> – Fixed an issue with rendering icon images to the printer.  
>>  
>>  
>> 5. Viewer  
>>  
>> – Fix for case in which a single memo is previewed with a small scale  
>> percent, such as 25.  
>> – When using D2005, the wsMaximized PreviewFormSettings does not position  
>> the window correctly. Added code to work around a bug in D2005  
>> (wsMaximized  
>> does not work properly when Position is poScreenCenter).  
>> – Fix for cases in which memo is empty. DrawText method was dividing by  
>> 0.  
>>  
>>  
>> 6. TeeChart  
>>  
>> – When the data was changed for a TeeChart in the detail band for each  
>> record the same TeeChart was being exported in PDF an XHTML.  
>>  
>>  
>> ----> Professional <-----  
>>  
>> 7. Dade  
>>  
>> – When a Calc Expression has table names re-aliased, need to include the  
>> '.' after the table name in the replace string. Otherwise can replace
