I do not think so.

Of course, we will perfect our product. Used protocol is not the main part of our product.

Later we plan to add other protocols support to make our product more flexible. You can read about our plans on our site, too.

To share a messenger market with MsgCommunicator, you should add great number of features to your messenger demo.

Network communication is less than 1/4 part of our product.

Best regards,
Ella Perelman
AidAim Software LLC

<http://www.aidaim.com>

Database, networking, data compression and encryption components for software developers.
