DbxOODBC 3.025 – Kylix/Delphi Open Source ODBC dbExpress driver.

The driver can work with anyone odbc alias. Supports ODBC 2, 3, 3.5.

Can work directly with native vendor driver ODBC (not using thus manager "odbc32.dll" of ODBC (iODBC, unixODBC)).

Changes log:

Version 3.025, 2006-01-12

- + Added support Delphi 2006 Win32 DBX Driver version 2.5 (Ansi Driver).
- + ReAllocation of memory at reading BLOBS is excluded (BLOB fragmentation mode).
- + Added processing of defect in Delpgi 2006:  
QC: 23553: Defect of assigning of parameters for ansi drivers.  
<http://qc.borland.com/wc/qcmain.aspx?d=23553>
- + Fixed: Fetch of binary BLOB and text WideChar.
