Hi Dennis!

I searched for your name in the newsgroup and found your instruction (which I already used when I bought D2005). I did everything in it. When changing to D2006 I got only one error in dcredit.pas:

This line required two more entries, so I inserted ps_Null,ps_Null. I hope this is correct.

```
PenStyles: array[TPenStyle] of integer = (ps_Solid, ps_Dash, ps_Dot, ps_DashDot, ps_DashDotDot, ps_Null, ps_InsideFrame, ps_Null, ps_Null);
```

Thanks for your current and past help!
Stefan.
