Hi David,

Maybe I can take these questions.

Basic version is free – see:
<http://www.gnostice.com/print2edocDownload.asp>
Nice interface too.
Cheers,
Kim.

Thanks for the information, but I wasn't really interested in the interface. I asked:

– does the product really come in a box?

No, we don't ship physical boxes at this time, but we do ship CDs on request. We will ship boxes in the future. The box image represents the logo/graphic for the product and this seems to be very common across vendors.

– what does the product do which the free ones don't?

I've mentioned a few items here, but a more detailed list can be found at:
<http://www.gnostice.com/print2edocFeatures.asp>

- * More formats JPEG, BMP, EMF, WMF (more in Pro)
- * Does not require GhostScript (some free ones do), which is actually not free for commercial use
- * Support for output resolution from 100 dpi to 1200 dpi for PDF (not all free ones do)
- * Document Creation Profiles for easy management and reuse of preferences (not all do)

Re: Writing PDF from Word (was: Re: concatenating PDFs)

- * Preview and enhance document in document Preview / Designer before creation (more in Pro)
- * Enhance output PDF documents to full-fledged fillable forms (in Pro)
- * PDF: Automatic conversion of URLs in content to clickable hyperlinks
- * PDF: Support for appending and inserting to existing PDF document (in Pro)
- * Define Text and Image based Watermarks and associate to Document Creation Profiles
- * Watermarking: Specify pages to place Watermark on
- * Watermarking: Text: Set text, position, font, fill color and rotation
- * Additional Actions: Email, FTP, NNTP, Launch Applications (some only in Pro)
- * Tight MS Office integration: "One-click" conversion from Microsoft Word, Excel and PowerPoint
- * MS Word: Convert Headings, Bookmarks and Hidden Bookmarks to PDF Bookmarks
- * MS Word, MS PowerPoint: Convert Hyperlinks, Table of Contents and Endnotes / Footnotes to PDF Links

Hope that helps.
