Hi,

Hmm... could you try with a different browser. It could be browser dependant.

best regards
Kim Madsen

JavaScript is enabled, of course. But the positioning of the sub-menu is, ehm, sub-optimal...

Believe it or not – the web design managed to make me overlook the shop links at top...

Hi,

Make sure that Javascript is enabled.

Otherwise try to visit: www.components4developers.com and click the Shop
xxx

With FireFox 2.0.0.14 under Vista x64 it's not possible for me to go to the order page because the popup menu is not reachable.

btw: Did you ever thought about a more clear web design?

Robert
