Thank you , Jugoslav.

I really like the call graph and the caller graph.

It helps me to get a glance of the calls of the project.

I can put cursor on the 'main' of main program and see the call hierarchy.

And I can trace and dig every call.

I also use module to pass global variables, however, as you mention, I cannot view

these variables in the call graph. It's quite pity.

Thanks a lot, again.

.
