Embest now offers a series of single board computers with low cost and flexible design. The boards are based on ARM7 or ARM9 CPU like S3C44B0, S3C2410, LPC2000, etc. And features with Ethernet, bluetooth, USB, IDE and so on. Special ODM/OEM service can be also provided. More information can be found at:<http://www.armkits.com/Product/sbc2410II.asp>

I am surprised that Qwerty has not chimed in telling how he was other than happy with the board he got from Embest. Qwerty, it's not like you to be so silent!

I believe you are refering to werty. Perhaps he's too busy coding (moving icons around) to read c.a.e these days.
