So you wanna know how to turn the pc on in 10 seconds (may vary).
Heres what you have to do to turn your PC on in 10 seconds.

1. Click on the start button
2. Press R it will take you to Run well go to run
3. Type Regedit and press enter

this will open Registry Editor, now look for the key

HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Control\ContentIndex

4. Now there find the key called "Startup Delay" double click on it,
now where its Base
5. Click Decimal, now its default value is 4800000 (75300:hexadecimal)
6. Change the value to 40000

Here you go, you have done it.

7. Now close the Registry Editor and Restart Your Computer
You'll See The Result
