Even thinking that of all the use cases, they "typically" take 3 months is  
wierd to me, if not to you.

And how does the fact stories is plural not mean that RCM sees the  
"typical" use case takes 3 months?

Well who didn't "pay much attention" given what I just remarked?

And "don't pay much attention" can be interpreted more than one way.

comp.object: Re: Second Dimension of Object Oriented Modelling

There's a difference between kill filing, or quasi kill filing and misreading or misinterpreting with no intent to misread, or misinterpret.

Finally what was misread or misinterpreted may not have been written to best convey the writers thinking/intention in the first place.

Cheers to you to <g>,

Especially for your GPL efforts,

Elliott
