Correction: eddie is incapable of /admitting/ that he is wrong. The record shows quite clearly that he is eminently capable of /being/ wrong :)

He's made threats of legal action in the past, and always backed down. Going by his track record I expect several more threats to be thrown about before he backs off. He'll either claim he doesn't want to waste his time, or make some other thinly-veiled excuse as to why, but I will be highly surprised if he carries through.

Mind you if he does try to get a restraining order I'd love to hear about it. Frivolous legal action is seldom more than an annoyance, but the results can be amusing indeed. Should be especially interesting since he can't seem to narrow down your location... and your name isn't close to being unique. Mine is unusual enough for him to at least locate me... I even told him what city I live in :)
