Hi;

I created a massive list of ebooks that are hosted on RapidShare. This took me so long that I'm embarrassed to mention the amount of time it took to auto verify 12,000 links and parse out the duplicates and bad links. The final result is 5000 working ebook downloads of all subjects. If I find another mass ebook source I may add to the list later.

I hope you enjoy the information and be sure to read the user agreement at the bottom of any page.

.
