Dear Friends,

We are coming on the heels of a very successful beta program with passionate feedback from over 30 beta customers and software engineers. We are launching a superior cost effective product aimed at a large global SME s and Testing Vendors with Innovative Testing Desktops, Real Time Collaboration and Live Reporting.

I would like to take this opportunity to thank all of you for your kind help.

We are very excited about our launch and want you to share in our excitement. So we are giving away a free download and 3 user licenses so you can start experiencing Zephyr right away!

It might be of help to some of you interested in test management tool, QA methodologies, test management system.

Thanks,

Sean
