Hello I got a source code that compiles fine. I am compiling the source code not with textPad but in textPad using the command compile java. My console window shows this;

```
'find' is not recognized as an internal or external command,
operable program or batch file.
'find' is not recognized as an internal or external command,
operable program or batch file.
Exception in thread "main" java.lang.NoSuchMethodError: main
Press any key to continue . . .
```

I installed jdk 1.5 update and jbuilder 6 personal edition.

If anyone could point me in the right direction that would be great and much appreciated thanks in advance.
