hello

I have problems to install the new SDK with build 1.5.0 (it worked in 1.4.0)
I have an import of a file, and now it doesnt seem to recongnize none of the
global variables
(out side the template).
I recieve this error
(Tech ID parameter is in other file which I do import to).
any suggestions?

Msg : Error handling request: Failed running Insight SDK installation
script.
