Hi all,

I want to monitor my tomcat 5.5 application server with JMX. I have study the sun tutorial to do this. but i am not able to fina a good tutorial for monitor Tomcat. Can any one help me to guide me how to configure the JMX for Tomcat application server?

I aplogies if i posetd a wrong news group... Please guide me a spcific news group for my doubts.

Thanks to you all...

—Ganesan.
