- *From:* Christopher Browne <[cbbrowne@xxxxxxx](mailto:cbbrowne@xxxxxxx)>
  - *Date:* Mon, 11 Apr 2005 12:52:43 GMT
- 

Following is a summary of articles spanning a 7 day period, beginning at 10 Apr 2005 06:03:19 GMT and ending at 01 Jan 1970 00:00:00 GMT.

Notes

=====

- A line in the body of a post is considered to be original if it does *not* match the regular expression `/^\s{0,3}(?:>|\S+>|\++|\s+|\*s)/`.
  - All text after the last cut line (`/^-- $/`) in the body is considered to be the author's signature.
  - The scanner prefers the Reply-To: header over the From: header in determining the "real" e-mail address and name.
  - Original Content Rating is the ratio of the original content volume to the total body volume.
  - Please send all comments to Christopher Browne <[cbbrowne@xxxxxxx](mailto:cbbrowne@xxxxxxx)>
