Real Mechanical Engineers use Fortran and like it.

Either I'm not Real or you are an idiot.

You are clearly not Real. You are either Rational or Integer.

Hah, I think that's the only post that gives this nut-job the credit that he deserves.

You know, I read the rantings of the cranks in sci.physics (who don't like Einstein, for some reason), and in sci.math (who don't like Cantor for some reason), but I never thought Lisp would acquire its very own crank.

I'm waiting with bated breath for him to tell us which monumental figures of computer science was mistaken (McCarthy perhaps?).
