

alt.php: date_format

date_format

Date: 01/27/04

Date: Tue, 27 Jan 2004 12:12:42 -0000

I have some data in an oracle database which has a data type of DATE and the dates are stored as 2004-01-20 17:43:49.0

When I get that information via PHP it outputs as 27-JAN-04

Does anyone know how to change this format as I want the time displayed as well? I have tried an SQL statement of
`SELECT DATE_FORMAT(date_column, '%l %i %m %d %y')` but this doesn't seem to work with an Oracle thin client.

Does anyone know an alternative (perhaps using the `date()` function???) or is there a standard date setting you can change so everything outputs with the time showing?
