Hi!

Can you do:

```
- error_reporting(E_ALL);
```

```
$sql = "delete from ....."  
print $sql;
```

```
$result = mysql_query("DELETE FROM inventorydata  
VALUES('$ProductID')");
```

```
var_dump($result);  
var_dump(mysql_error());  
var_dump(mysql_rows_affected());
```

HTH, Jochen
