SendStudio – <http://www.interspire.com/sendstudio/>

Users can subscribe and unsubscribe from the list, e-mail is formatted with unsubscribe details, it can generate HTML forms for them to unsubscribe. It can also track users clicks to your links, so you know which of your subscribers clicked on your links etc.

Sends e-mail in both HTML or TEXT, you are able to have the newsletter formatted in both depending on your users PREFERENCE.

The list will also auto-delete inactive e-mail accounts and so forth.

Check <http://www.interspire.com/sendstudio/> for feature details.

Yours Sincerely,  
Samuël ML Lison
