Hello,

I have a little script that display or hide input field depending on the choice of a select.

It is working fine, but i can not initialise the default value of the select and have it display the correct input box...

VooDoo

IMHO this is a javascript problem, and has nothing to do with PHP.
Anyway I don't really know where the problem is, coz the code that you post doesn't give any clue of what the problem could be.

Try c.l.javascript

Hendri Kurniawan
