- 

```
<?php
$mix=array(
array("A",10),
array("B",5),
array("C",100)
);
function com($x,$y){
echo $x[0];
}
usort($mix,'com');
```

?>

i think the \$x[0] result is A,  
but the final \$x[0] result is BC.  
why???

.
