Hi,

Last year, I got a php manual from my friend. It is different with what is available for download right now, because it has user comments inside (in separated file, named php_manual_notes.chm.

I was looking for the new version of it on google, but I couldn't find any of it. Could someone tell me where i could have this ? It is very usefull for me to read some examples that listed on it.

thanks

adwin
