Hi, I'm pulling my hair out trying to make this work and any help would be appreciated ...

When I try to move the uploaded file:

```
move_uploaded_file($_FILES["file"]["tmp_name"],"/var/www/vhosts/  
mydomain.com/intranet/httpdocs/lib/slips/in/$filename.pdf");
```

I get the following error:

```
Warning: move_uploaded_file(): SAFE MODE Restriction in effect. The  
script whose uid is 10001 is not allowed to access /var/www/vhosts/  
mydomain.com owned by uid 0
```

However, my `phpinfo()` tells me that the master value for safe mode is Off. Why do I keep getting SAFE MODE errors iwhen php tells me that safe mode is turned off?

Pleeeeee help. Thanks.
