Hello i have deficulty to deal with cookies in PHP
my website is <http://kal.am>
cookies not working and when i tried to print session array i got the
following strange output:

```
__utma 238121498.423365001.1211713664.1212127389.1212130222.30
__utmz 238121498.1212127389.29.4.utmcsr=hffar.com|utmccn=(referral)|
utmcmd=referral|utmctt=/
__utmc 238121498
cprelogin no
cpsession closed
PHPSESSID a1db2915fffd55355c16a97e13741ccf
```

could you notice that line "utmcsr=hffar.com" it is refers to other
website(my old website)!!!!!!!!!!

if some one know how to chage this line "utmcsr=hffar.com" to refer to
my website www.kal.am it may solve the problem

I don't know what your exact problem with the \$COOKIE array is, however, the __utmz cookie refers usually to Google Analytics, which I could not find on your current site. You can find some details about that cookie @ <http://www.codeproject.com/KB/scripting/GoogleAnalytics.aspx> Having that hffar.com string in it should not cause any problems whatsoever

The only cookie I get set is this:
Set-Cookie: PHPSESSID=adf8479d9bd2b73320f1cbe39e8f2cc8; path=/; domain=.kal.am

which seems perfectly OK to me.

Could you tell us more about the exact problem you're having, what you are trying to do and where it fails?
