Hi every body,
am trying to create a php script that get a daily picture but am
having a problem with that,

here is the code am using:

```
<?php

$date = date("Y-m-d");
echo "";
$ext = ".jpg";

$photo = "/DailyPic/photos/thumbs/$date". $ext ;
switch ($photo){
  case "file_exisits ($photo)":
    echo "<a href='/DailyPic/photos/$date'. $ext .'>";
    echo "</a>";
    break;
  default:
    echo "<a href='/DailyPic/photos/default.jpg'>";
    echo "</a>";
    break;
}
```

Re: Daily pic problem

?>

what I get is the default image only so I need some help please.

Thanks for and support given in advance
shror

```
>>> switch ($photo){  
>>>> case "file_exisits ($photo)":
```

Doesn't work. \$photo is a string (filename) and is not equal to the result from file_exists (true/false) value. And I think you had a typo in transcribing your code :-).

Why use a switch statement here, anyway? Just us

```
if (file_exists($photo)) ...
```

Thanks Jerry for your quick response, but I have tried the if (file_exists (\$photo)) and its also giving me the default image

here is the code I used:

```
<?php
```

```
$date = date("Y-m-d");  
echo "";  
$ext = ".jpg";
```

```
$photo = "/DailyPic/photos/thumbs/$date". $ext ;  
if (file_exists ($photo)){  
echo "<a href='/DailyPic/photos/$date". $ext .">";  
echo "<img src="";  
echo "$photo" ;  
echo "></a>";  
}  
else {
```

Re: Daily pic problem

Re: Daily pic problem

```
echo "<a href='/DailyPic/photos/default.jpg'>";  
echo "<img src="";  
echo "/DailyPic/photos/thumbs/default.jpg";  
echo "></a>";  
}  
?>
```

thanks any way for any support supplied
